CAREER SUMMARY

Aspiring data professional with hands-on experience in machine learning, data analysis, and collaborative problem-solving. Eager to apply analytics to detect financial crime and translate complex data into actionable insights.

CORE SKILLS

Programming languages: C#, Python, R	Stakeholder Communication
SQL Querying and Optimization	Agile mindset
Predictive Modelling, NLP and Machine Learning	Team Collaboration
ETL/ELT, Docker and Azure cloud platform	Problem Solving and Analytical Thinking
Feature Engineering, Data Cleaning and Preprocessing	Organization Skills
Power BI, Microsoft Excel and PowerPoint	German (B1 level) and Dutch (Beginner)

PROJECTS

REVENUE OPTIMIZATION MODEL FOR AIRLINES

- Built a data-driven revenue optimization model for the airline industry using real-world aviation data.
- Applied statistical and forecasting techniques to predict demand and optimize ticket pricing.
- Enabled dynamic pricing and route management to maximize airline profitability.

LOAN RISK PREDICTION SYSTEM

- Developed a machine learning-based Loan Risk Prediction System to assess applicant default risk.
- Analyzed financial and demographic features (income, credit score, loan amount, etc.) to classify borrowers.
- Enabled data-driven lending decisions by improving accuracy in credit risk evaluation.

AUTOMATED FRAUD DETECTION SYSTEM FOR FINANCIAL TRANSACTIONS

- Built ML-driven fraud detection (Random Forest, XGBoost) to flag and classify anomalous transactions.
- Applied NLP to extract insights from unstructured reports, boosting automated risk reviews.
- Delivered real-time Power BI dashboards for investigation prioritization and decision-making.

PROFESSIONAL EXPERIENCE

INTERN DEVELOPER | Born Digital | Auckland, New Zealand

November 2023 – February 2024

- Automated internal documentation workflows and UI enhancements, improving content discoverability for compliance use cases.
- Contributed to sprint reviews and stakeholder demos, strengthening policy-to-practice feedback loops.

SOFTWARE ENGINEER | Harbinger Systems | Pune, India

July 2019 – March 2022

- Built and monitored software integration across enterprise platforms (Oracle, LinkedIn), ensuring integrity of data; independently delivered a full LinkedIn integration from requirements to deployment on time and bug-free.
- Enhanced backend logic and implemented performance improvements, supporting downstream analytics and decision-making.
- Collaborated with teams to deliver business-aligned solutions and got a Swagger API presentation badge for great presentation.

TRAINEE SOFTWARE ENGINEER | Harbinger Systems | Pune, India

January 2019 – June 2019

- Improved web-based UI components with a focus on clean, modular code.
- Awarded "Superstar of the Month" for code quality and contribution to team deliverables.

EDUCATION

MASTER'S DEGREE | Data Science | University of Auckland

February 2023 – June 2024

MASTER'S DEGREE | Computer Application | Savitribai Phule Pune University

June 2016 – May 2019

BACHELOR'S DEGREE | Computer Science | Savitribai Phule Pune University

June 2013 – May 2016

INTERESTS

Volunteered with the SHB Foundation, contributing to a mental health app and website. Conducted research on database optimization (Mining Multivalued Dependencies), exploring scalable algorithms for schema design. Enjoy painting and building pet projects such as LLM fine-tuning with Hugging Face.
